## 71100 - Vent Top Opening Out Aluminum Bolt-on Window

This heavy marine aluminum watertight window has a top vent hinging outward. It is available in custom shapes and sizes. This window has a bolt-on style frame and a 1" spigot that projects through the bulkhead opening. It will suit a glass thickness of 10-19mm.

Hinges are located at top of vent. Side quadrant arm comes with tightening knob for hold-on. Once the glass pressure clamps are tightened, an exterior rubber seals the window to be watertight.
