71110 - Full Hinged In Vent Alum. Bolt-on Window

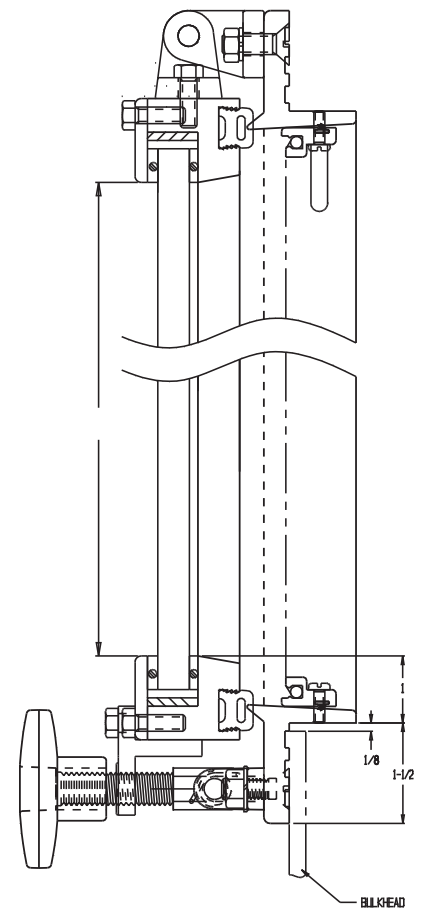

This heavy marine aluminum watertight window is a full vent hinging inward. It is available in custom shapes and sizes. This window has a bolt-on style frame and a 1" spigot that projects through the bulkhead opening. It will suit a glass thickness of 10-19mm.

Once the glass pressure clamps are tightened, an exterior rubber seals the window to be watertight.

Pictured window has a clear anodized finish frame with radius corners. Other finishes are available.

Glass is clear tempered. Other tinted glass options are available. Heated glass can be adapted to this type of frame. A removable screen is also pictured here.
